

Olist E-Commerce Performance & Marketing Insights Report

Data-driven analysis of sales growth, geographic spend, customer retention, and operational fulfillment

PRIMARY REGION Brazil (Olist Marketplace)	PREDICTABLE AOV R\$ 153 – R\$ 165	TOP CATEGORY SALES R\$ 1.2M+ (Health & Beauty)	ONE-TIME BUYERS 96.9% of Total Base
--	--------------------------------------	---	--

Executive Overview

Analysis of the Brazilian e-commerce dataset reveals strong acquisition velocity, predictable order values (AOV R\$153–R\$165), and high revenue concentration in Southeast states. However, an overwhelming 96.9% one-time buyer rate and logistics delays hurting customer sentiment highlight critical growth opportunities in post-purchase retention and fulfillment alignment.

01 Spending Stability & Geographic Concentration

Customer purchasing power remains predictable, establishing a dependable baseline for paid ad acquisition ROI calculations. Orders grew **3.3x between January and March 2017**, validating launch traction.

Core Revenue Hub (Southeast) Over 60% of total revenue originates from just three states: São Paulo (SP), Rio de Janeiro (RJ), and Minas Gerais (MG). Digital ad campaigns (Meta/Google Ads) yield the lowest CPA in these markets.	High-AOV Regional Expansion Customers in Bahia (BA) and Santa Catarina (SC) spend significantly more per order (R\$ 163–R\$ 170) vs. São Paulo (R\$ 136.39). Targeted premium bundles in these regions maximize average basket size.
--	---

02 Core Product Revenue Drivers

Revenue is anchored by three primary catalog categories exceeding R\$ 1.0M in total gross spend:

CATEGORY NAME	VOLUME STRATEGY	TOTAL ITEMS SOLD	AVG ITEM PRICE	GROSS REVENUE
Health & Beauty	High Volume / High Spend	~9,600	R\$ 130.00	R\$ 1,250,000+
Watches & Gifts	High Ticket / Low Volume	~5,600	R\$ 199.04	R\$ 1,200,000+
Bed, Bath & Table	High Volume / Mid Ticket	10,953	R\$ 93.44	R\$ 1,020,000+

03 Customer Retention & Logistics Impact

Retention and fulfillment velocity present the single greatest revenue leverage points across the marketplace:

2.0x

REPEAT BUYER SPEND MULTIPLIER

10.6 Days

AVG DELIVERY (5-STAR REVIEWS)

21.3 Days

AVG DELIVERY (1-STAR REVIEWS)

Massive Retention Gap

Repeat customers spend **double** what one-time buyers spend (~R\$305–R\$320 vs ~R\$160). Converting just 2% of existing one-time buyers into repeat orders would add **R\$300,000+ in organic revenue** without ad cost.

Delivery Speed Drives Ratings

Over **3,500 1-star reviews** stem directly from late fulfillment. Delivery delays destroy retargeting efficacy, making realistic delivery expectations a prerequisite for repeat purchasing.

04 Executive Marketing Strategy Roadmap

Actionable roadmap to optimize marketing spend, boost customer lifetime value, and resolve friction points:

1

Geographic Paid Ad Budget Allocation

Focus 60%+ of acquisition ad spend (Meta/Google Ads) on SP, RJ, and MG to lock in low Cost-Per-Acquisition (CPA). Deploy high-ticket bundle ads specifically to BA (AOV R\$169.76) and SC (AOV R\$162.58).

2

Category Merchandising & Bundle Optimization

Feature Health & Beauty and Watches & Gifts heavily as acquisition lead offers in creative banners. Pair Bed, Bath & Table with multi-item bundles to push cart sizes past the R\$ 160 threshold.

3

Automated Post-Purchase Retention Sequence

Build a 30-day post-purchase automated email flow offering replenishment reminders and cross-category discounts to capture high-margin repeat revenue from the 96.9% single-purchase customer pool.

4

Logistics Realism & Post-Purchase Messaging

Align checkout estimated delivery dates with actual shipping performance to avoid late-delivery disappointment, protect brand equity, and preserve retargeting effectiveness.

Portfolio Note

This strategy report synthesizes exploratory queries from the Olist relational dataset, demonstrating the integration of technical SQL data analysis with commercial executive recommendations.
